

## ■ Chapter: The Meme Kingdom of Pepe

The winds howled across Ethereum as Newt marched forward, his journal heavy with the tales of Solana and Shiba Inu. But a new rumor echoed through the digital taverns— a land more absurd, more chaotic, more meme-fueled than anything before: Pepe Land.

**Newt (thinking):** “If Shiba Inu was fire, then Pepe must be pure madness.”

He followed a neon-green river of liquidity until he reached a colossal frog statue, its bulging eyes staring into eternity. The gates opened with a croak that shook the very chain.

## ■ Inside Pepe Land

The world was painted in memes: dancing frogs, laughing GIFs, endless “feels good man” echoes across the streets. Traders wore Pepe masks, their chants forming a strange rhythm: “PEPE! PEPE! PEPE!”

### **Newt’s Notes (Pepe Land):**

- Circulating Supply: 420.69 trillion PEPE
- Market Cap: ~\$3.3 billion USD
- 24h Trading Volume: \$500M – \$700M USD
- Holders: ~230,000+ addresses
- First launched: April 2023, skyrocketed within weeks

**Newt:** “So vast, yet... so playful. This land thrives not on utility, but on culture.

Pure meme energy sustains it.”

## ■ The Dialogue with the Meme Priests

A group of cloaked figures—Meme Priests of Pepe—approached.

**Priest:** “Traveler, you crossed the Shiba flames. Why come to Pepe?”

**Newt:** “I seek stories. I seek the essence of memes across chains. Tell me, what makes Pepe thrive?”

The priests laughed, their voices echoing in auto-tune:

**Priest:** “Utility is temporary. Memes are eternal. Our token began as a joke, yet here it stands with billions in value. The frog cannot die, for laughter cannot be killed.”

## ■ The Lesson

As the night fell, neon frogs hopped across the sky like constellations. Newt closed his journal and whispered:

**Newt:** “First Solana, then Shiba, now Pepe... Each land has shown me: tokens are more than numbers. They are stories. They are culture. They are the echoes of humanity hidden inside code.” He walked on, the meme chants fading behind him, knowing his next journey would take him even deeper into the madness of Web3.
